
FREE/SWAP: PSSC Film loop collection and projector

Posted by Chad Dorsey - 2008/09/17 09:20

The best of the vintage physics equipment: a film loop projector in working condition, complete with a collection of maybe 15 classic film loops. Experiment showing the ball drop from the mast of a boat, marshmallows in a bell jar, and much more. Email me via my profile if interested. Free unless I get a good swap offer.
